

Mohammad Asadi

Senior Full Stack Engineer

✉ m80684825@gmail.com 📍 Padua, Veneto, Italy  [linkedin.com/in/mohammad-asadi-5bba5b185](https://www.linkedin.com/in/mohammad-asadi-5bba5b185)

Profile

AI Full-Stack Engineer with 8+ years of experience designing and building scalable, production-grade web and mobile applications powered by AI/ML technologies.

Proven expertise in end-to-end system architecture, LLM and AI model integration, cloud-native backend services, and modern frontend development.

Strong focus on performance, security, clean code, and maintainable systems, with a track record of delivering AI-driven solutions that create measurable business impact.

Job History

Full Stack Engineer, Unilab Sri	02/2025 – 11/2025 Padova, Italy
• Led and mentored a 7-member agile engineering team, designing and delivering scalable full-stack applications with robust Python backend systems and AI-powered features. • Architected and optimized MySQL and PostgreSQL databases, leveraging advanced SQL, indexing, stored procedures, and performance tuning to support high-traffic, data-intensive AI applications. • Developed end-to-end backend services and automation frameworks using Python (Django, FastAPI) with RESTful and GraphQL APIs, integrating AI/ML models and ensuring seamless frontend and third-party system communication. • Implemented and maintained CI/CD pipelines using Docker, Jenkins, and AWS, improving deployment reliability and efficiency for AI-powered services. • Designed and integrated AI/ML pipelines into production workflows, optimizing model inference and feature delivery for real-time applications. • Drove code reviews, refactoring, and performance optimization, while mentoring team members on AI integration, Python best practices, and full-stack engineering standards.	
Python Engineer, D&D Partners	03/2024 – 11/2024 Padua, Veneto, Italy
• Designed, developed, and maintained scalable backend systems using Python frameworks such as FastAPI, Django, and Flask. • Built and integrated RESTful and GraphQL APIs to enable seamless communication between backend services and frontend clients. • Managed and optimized databases including PostgreSQL, MySQL, and NoSQL solutions (MongoDB, Redis, Firebase), ensuring data integrity, high performance, and efficient data access. • Implemented authentication, authorization, and security best practices to protect sensitive user data. • Improved backend performance, scalability, and reliability to handle high traffic and concurrent requests. • Collaborated closely with frontend and mobile teams to ensure smooth API integration and feature delivery.	

- Developed unit and integration tests, maintained CI/CD pipelines, monitored system health, and proactively troubleshoot production issues for stable deployments.

Backend Engineer, 18all4All

04/2022 – 07/2022

Remote

- Designed, developed, and maintained high-performance backend systems with a focus on scalability, reliability, and clean, maintainable architecture.
- Built and integrated RESTful and GraphQL APIs to enable secure, efficient, and scalable communication between backend services and client applications.
- Implemented authentication, authorization, and security best practices to protect sensitive user data and ensure compliance with standards.
- Optimized backend performance, including database queries, caching strategies, and request handling, to handle high traffic and concurrent users.
- Managed and optimized databases such as PostgreSQL, MySQL, and NoSQL solutions (MongoDB, Redis, Firebase) for efficiency, integrity, and scalability.
- Collaborated closely with frontend, mobile, and product teams to translate business requirements into robust backend features.
- Developed unit and integration tests, maintained CI/CD pipelines, monitored system health, and proactively resolved production issues for stable deployments.
- Integrated third-party services and SDKs where necessary, ensuring seamless functionality and performance across the system.

Web Developer, Khiyal Rahat

03/2021 – 08/2021

Remote

- Designed, developed, and maintained scalable Python applications using Django, Flask, and FastAPI, supporting high-availability production systems.
- Built and optimized RESTful APIs, background workers, and asynchronous services for data-intensive and user-facing applications.
- Designed and managed relational and NoSQL databases including PostgreSQL, MySQL, MongoDB, and Redis, ensuring data integrity and performance through efficient schema design and query optimization.
- Implemented authentication, authorization, and security best practices, including token-based authentication and role-based access control.
- Developed data processing pipelines and automation scripts to streamline internal workflows and improve system efficiency.
- Integrated third-party services and external APIs, ensuring reliable error handling and monitoring.
- Wrote unit, integration, and end-to-end tests, improving code coverage and system stability.
- Built and maintained CI/CD pipelines and containerized services using Docker, supporting smooth and reliable deployments.
- Monitored application performance, troubleshoot production issues, and optimized systems for scalability and reliability.
- Collaborated closely with frontend, mobile, and DevOps teams in agile development environments.

Education

Bachelor's degree. Information Engineering, University of Padua (UNIPD)

09/2023 – 09/2027

High School Diploma. Mathematics and Physics,
National Organization for Development of Exceptional Talents (Sampad)

09/2016 – 06/2022

Skills

Languages

JavaScript, TypeScript, Python, Java, Dart, Swift, Kotlin

Mobile Development

React Native, Flutter, IOS (Swift), Android (Kotlin), Cross-Platform App Development

Frontend

React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Responsive Design

Database

PostgreSQL, MySQL, MongoDB, Firebase, Redis, Database Design & Optimization

Backend

Node.js, Express.js, Nest.JS, Django, Flask, FastAPI, Spring Boot, REST & GraphQL APIS

DevOps

Docker, CI/CD (GitHub Actions, Jenkins), AWS, Firebase, Deployment Automation

Language

English

Proficiency

Italian

Proficiency
